PROJECT OBJECTIVES

3D Visualisation for Learning in the Classroom with Mobile Phone Devices is an Erasmus+ KA1 mobility project which aims at enhancing learning mobility of individuals by engaging staff in adult education.

Two staff members of Skills International GmbH, Austria, participate in a structured training course at JPE in London. The aim of the project is to bridge the gap between the provision of traditional internet-based learning offer

with the requirements of learners using mobile devices. As more and more learners are using smart phones and tablets, the learning resources must be adapted to mobile learning.

ELEARNING

An eLearning course was set up in MOODLE to have an online learning system in place that enables to upload educational resources and information about 2D, 3D and 4D design tools and services to create user-driven innovation in digital learning.

TARGET GROUPS

The style of this Erasmus+ KA1 course is structured for adult education staff and trainers who wish to use mobile phone devices such as smart phones and tablets with 3D visualisation effects.
