

Fantasy to Reality

From Adult Literacy Skills to Augmented Reality

The Erasmus+ KA1 project aims to enhance the learning mobility of staff in adult education to implement Augmented Reality as a new ICT-tool with considerable potential for the provision of training and learning services.

Erasmus+ KA1 Staff Training by JPE in London

Two staff members from Skills International GmbH, Austria had the chance to participate in the training 'Augmented Adult Literacy and Numeracy in the Real World' for one week in December 2014 provided by JPE in London.

We first visited museums in London to identify the state-of-the-art of AR applications and take some samples for further piloting.

Augmented Reality (AR) as a way to engage and empower learners was in the centre of the interactive KA1 training paired with open innovation and co-creation of content.

The exchange of know-how continued intensively after the staff training. JPE and Skills International GmbH tried out free tools, followed the latest developments about 3D-printers and created markers with QR codes.

A Moodle course was installed to have an online Learning Management System in place that enables to upload educational resources and information about AR.

The partners followed the rapid innovation in Augmented Reality educational applications for computer and mobile phones and trialed different software to create content.

Learners translated e.g. training material texts with smart phone apps from English to Turkish in the Skills International GmbH Erasmus+ KA1 workshop for ECQA Certified EU Project Managers in Vienna in May 2015.

The results were used in trainings and have raised interest in Adult Literacy workshops.
